## Jetway® Passenger Boarding Bridge Refurbishment

# REHAB

## FROM OLD TO BOLD!

## Make an old bridge like new

Refurbishment is a convenient way to maximize the value of the initial investment while extending the service life of the passenger boarding bridge.

A Jetway Systems® refurbishment improves safety and reliability while protecting aircraft, airport assets, and personnel.

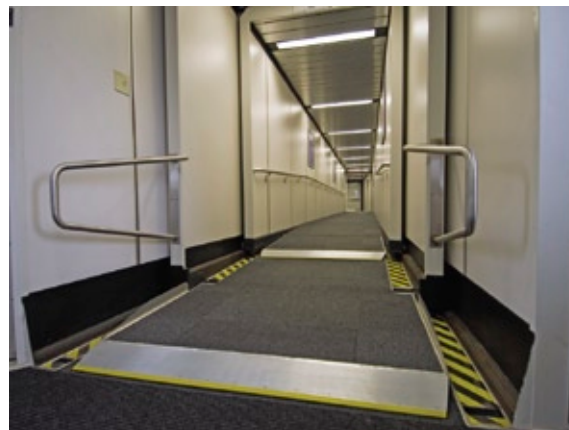

## Why is a Jetway® refurbishment a smart choice?

A passenger boarding bridge refurbished at our facility ensures that the latest safety codes are complied with. JBT AeroTech, Jetway Systems® designs, modifies, and enhances airport equipment using current production technology.

## Maximize the value of your initial investment

## Some refurbishments can be done in the field

Although major structural overhauls and cosmetic refurbishments are usually performed at our facility, many upgrades can be performed in the field at the location of the passenger boarding bridge.
